WHY WE ENGAGED &

What Worked

Kaoko GES is a NIPDB-supported startup operating across marine renewables, clean cooking and sustainable fuels. We attended the **1st EU–Namibia Business Forum in Brussels** to find partners who could turn Namibia's green energy potential into funded reality.

WHY WE ENGAGED

- ✓ Access EU-aligned expertise for emerging clean energy markets
- ✓ Mobilise early-stage grant finance unavailable domestically
- ✓ Validate our clean cooking model with credible European co-partners
- ✓ Position Namibia as first-mover in low-pressure solar hydrogen cooking

MOU Signed at the Forum

Kaoko × COOSHA Impact Ventures × Solhyd
Clean cooking via low-pressure solar hydrogen — Namibia pilot

WHAT WORKED IN PRACTICE

Structured matchmaking

NIPDB facilitation created quality introductions, not random networking

Shared vision

COOSHA & Solhyd aligned instantly on Namibia's H₂ cooking opportunity

Finexpo Belgium grant

Forum credibility unlocked Belgian grant funding for the pilot

MOU → Funded pilot

Partnership translated to a fully funded project within months

MARKET INSIGHT

Namibia as a Green Energy Magnet

Abundant solar resources, local expertise and NIPDB's institutional backing made Namibia an unmissable proposition. The convergence of untapped green energy and an underserved cooking fuel market was the winning combination that attracted European partners.

FORUM AS CATALYST

Compressed Years into Days

The COOSHA-Solhyd-Kaoko partnership would conventionally have taken years to form. Structured matchmaking and shared purpose compressed this into a single high-trust event — delivering a signed MOU and a fundable pilot blueprint.

WHAT WE SEEK NEXT

Scale, Invest & Unlock

Kaoko now seeks EU partners to: scale the clean cooking pilot across SADC, attract offshore currents and waves co-investors to Namibia's coastline, and develop RFNBO green methanol and SAF.

LOOKING AHEAD

What We Are Seeking Next

Kaoko GES is ready to leverage the momentum of the 1st Forum at the upcoming 2nd EU–Namibia Business Forum — bringing proven partnerships and funded pilots to the table.

01

Scale Clean Cooking Pilot

Namibia → SADC

Expand the Finexpo-funded low-pressure hydrogen cooking pilot across SADC. Seeking EU capital partners, technology licensors and distribution co-investors.

02

Marine Renewables Investment

Offshore current & waves

Namibia's Atlantic coastline holds world-class offshore wind potential. Seeking EU technical partners and investors for feasibility studies and early-stage project development.

03

Sustainable Fuels Offtake

Green Methanol · SAF

Develop green methanol and SAF .
