Chatham House Rules

Shared Intelligence: How Responsible AI Drives Trust and Transformation

Fishbowl Session

Shared Intelligence: How Responsible AI Drives Trust and Transformation

Moderator:

Olga Popkova
Senior Legal Counsel
SAP

Duncan Hinnels
Associate General Counsel
Cognizant

Caroline Lyannaz
Partner
Eversheds Sutherlands

Miriam-Elisabeth Bosse
Head of Legal Europe
Cognizant

Panel Members' Key Takeaways

- **Agentic AI** shifts legal accountability to the deploying organization. Governance must be **designed in**, not bolted on.
- **Contracts** are not just risk allocation tools – they are operational governance instruments that determine whether responsible AI principles actually work in practice.
- **Responsible AI is becoming a source of competitive advantage** – organisations that build trust through governance, transparency, and accountable AI deployment will outperform those that treat it as a compliance checkbox.
