Health

Lei Zhang
Public Health Informatics
Manager
Southern Nevada Health
District

Christian Young,
MD, FACEP
Vice Chief, Department
of Emergency Medicine
University Medical
Center of Southern
Nevada

Learning Objectives

After attending this session, participants will be able to:

- Describe the complementary roles of HIEs, public health agencies, and health systems in enabling bi-directional information exchange.
- Identify practical strategies for overcoming technical, policy, and operational barriers to public health–healthcare data sharing, including lessons learned from Nevada.
- Apply real-world examples of how improved information exchange can support public health priorities while reducing reporting burden and increasing value for health systems.
