

Sustainability in motion in Cell & Gene Logistics : High-quality & multimodal solutions to reduce emission

time:matters supply chain solutions

10 offices world-wide

- > 98.5 % net performance
- > 600 partners globally, incl. 25 partner airlines
- > 120 countries served
- > 500 destinations

- > 320 employees
- > 250 experts for quality & service excellence 24/7

- > 90 % of shipments within <48 h
- > 345.000 shipments per year
- > 20.000 tons per year

Your Global Specialty Logistics Service Provider for ATMPs

EXPERTISE IN ATMP SUPPLY CHAINS

Zero failure tolerance

10 + Years experience in transport of **personalized medicines**.

4 Commercial **CAR-T & CGT programs** supported.

~25% **Annual growth** through strategic investments and developments.

> 40,000 **Life-saving treatments** delivered to patients **globally**

Your Global Specialty Logistics Service Provider for ATMPs

time:matters
High-Performance Life Sciences Logistics

t:m benefits

SPEED

Fastest solutions for time- and temperature critical transports.

CONTROL TOWER

Exclusive shipment monitoring & proactive status updates 24/7.

QUALITY AND RELIABILITY

Highest quality standards, GDP compliance, WMDA, ISO 9001 & 14001.

TEMPERATURE CONTROL

Packaging and temperature control solutions from +37°C to -196°C.

CENTRAL POINT OF CONTACT

Expert Cell & Gene Therapy Team
Centralized management.

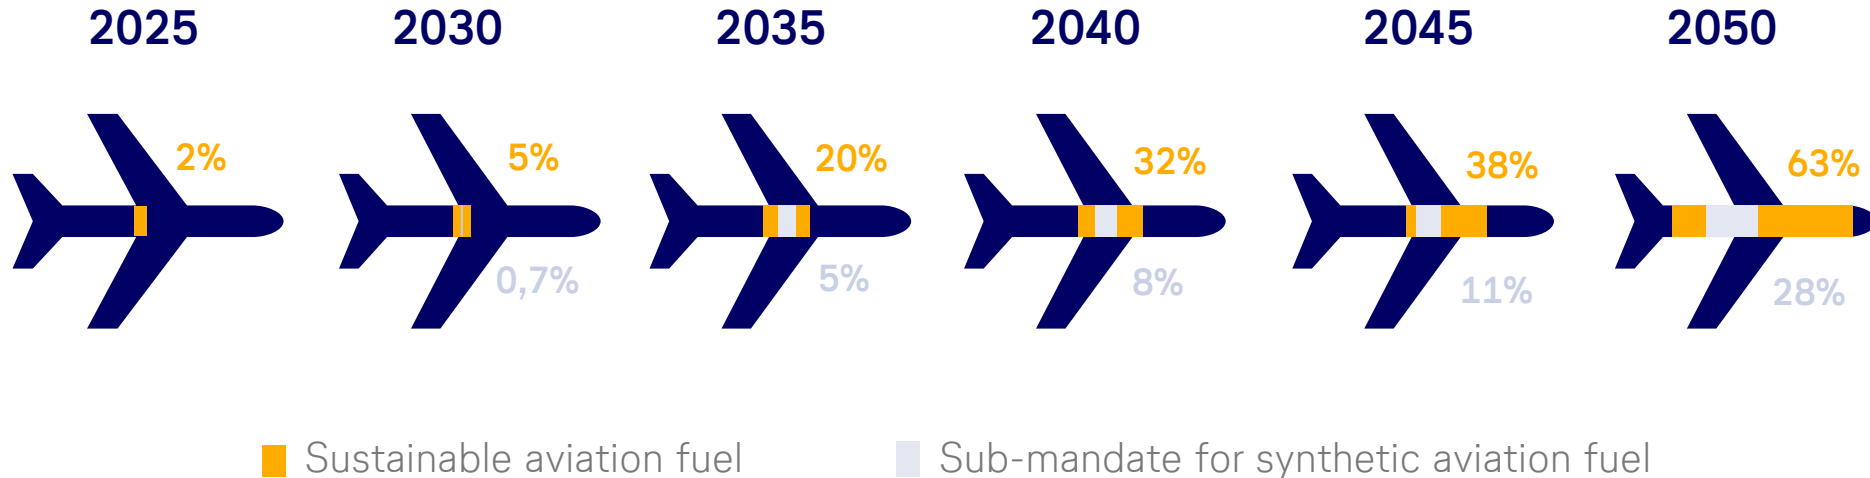

SUSTAINABILITY

Measures for avoidance, optimization reduction and compensation of CO₂.

What is happening in the World of Sustainability?

- Transparency
- Constant evolutions of rules and regulations
- CSRD (Corporate Sustainability Reporting Directives) is here!
- Clean energy demand is rising
- Circular & reverse logistics is growing
- European (EU & UK) SAF Mandate since January 2025

sustainability:matters – 3 Main Pillars

Avoidance

Avoid emissions & waste before they are created.

Inset

Reduce emissions by investing in mitigation methods along the own supply chain.

Offset

Compensate emissions which can't be avoided or reduced.

sustainability:matters – 3 Main Pillars + 1

Avoidance

Avoiding emissions & waste before they are created.

Inset

Reducing emissions by investing in mitigation methods along the own supply chain.

Offset

Compensating emissions which can't be avoided or reduced.

Removal

Capturing and eliminating carbon dioxide from the atmosphere.

How to reduce emissions on your transport?

- Optimizing routing by selecting a greener transport solution
- Combine solutions with a lower environmental impact
