Title: AI: The Game Changer in Specification Management
Date: 06/05/2025
Time: 2:30pm EST
LU: 0.5 RIBA/LU

Program Summary

AI is poised to transform the way we approach specifications, enabling more strategic decision-making and boosting operational efficiency. This session will explore how emerging AI technologies are reshaping the specification process and driving innovation across the industry.

Join us to learn how AI can enhance specification accuracy, reduce errors, and streamline workflows, allowing your firm to focus on delivering higher-quality projects. Plus, find out how to strategically adopt AI to foster long-term growth and competitive advantage for your firm.

Learning Objectives

1. Explore common AI technologies and concepts to build a foundational understanding of their relevance in managing construction specifications
2. Discuss key data types crucial to construction specifications, and learn how AI applications enhance efficiency and accuracy in handling this data.
3. Examine AI's role as a co-pilot in accelerating information delivery and automating tasks to improve efficiency.
4. Gain insights into practical AI use cases that optimize specification development, increasing both accuracy and efficiency in project workflows.

Speakers:

- Chris Metropulos
